## LABORATORY-GROWN DIAMOND REPORT

December 02, 2020

GIA Report Number.......................................................6361851479

Identification.........................................................Laboratory-Grown

Shape and Cutting Style........................Cushion Modified Brilliant

Measurements............................................... 7.12 x 5.93 x 4.00 mm

## LABORATORY-GROWN DIAMOND SPECIFICATIONS*

Carat Weight........................................................................ 1.51 carat

Color..................................................................................................... F

Clarity............................................................................................. VS1

## ADDITIONAL INFORMATION

Polish.................................................................................... Excellent

Symmetry............................................................................. Excellent

Fluorescence................................................................................ None

Inscription(s): GIA 6361851479, LABORATORY-GROWN

Comments: Additional growth remnants are not shown. This is a man-made diamond produced by CVD (Chemical Vapor Deposition) growth process and may include post-growth treatments to change the color.
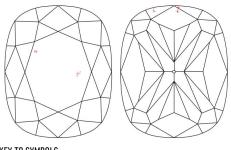

## PROPORTIONS

thick - very thick (faceted)

64%

67.5%

Profile not to actual proportions

## CLARITY CHARACTERISTICS

### KEY TO SYMBOLS

○ Growth Remnant      Twinning Wisp      \ Growth Remnant

Red symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown.
